SWARUP PADHY

QA Engineer (Fresher) - Manual · Automation · API Testing

+91 7606075995 | swarup.pdy@gmail.com | linkedin.com/in/swarup-padhy | github.com/swarup-padhy

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience in manual testing and Python-based test automation. Completed an industry internship where I independently tested an AI-powered application and reported real bugs. Skilled in Selenium, Pytest, and POM architecture with working projects on GitHub. Comfortable testing web apps, REST APIs, and accessibility compliance.

TECHNICAL SKILLS

Manual Testing:	Test Case Design · Defect Reporting
Test Automation:	Selenium · Pytest · Python · POM Architecture · Allure Reports
API Testing:	Postman · REST API Testing
Accessibility:	WCAG 2.1 · WAVE Tool · Chrome DevTools
Tools & Infra:	Git · JIRA · MongoDB · VS Code · SQL
Web technology:	HTML/CSS · React · AI (exposure)

WORK EXPERIENCE

Intern – Doveriye | Hyderabad, India Aug 2025 – Nov 2025

Project: RAG System — AI-powered script generation application Python · Vector DB · Local LLM

- Designed and executed 50+ manual test cases covering core features, edge cases, and cross-device responsiveness for an internal AI product.
- Identified and documented real defects including a filter bypass bug during script generation, an empty-field validation failure, and broken line break formatting in downloaded text files.

PROJECTS

Manual QA of WebSocket-Based Chat Application -- GitHub Link Manual · Postman · MongoDB · REST API

- Designed and executed manual test case covering user authentication, real-time messaging, WebSocket behaviour, and image uploads resulting in 25 pass, 4 fail.
- Found and reported Critical defects: duplicate email registration bypass, JWT token not invalidated on server after logout, image message send failure, and zombie WebSocket connection persisting post-logout.
- Delivered a complete QA artifact suite: requirements doc, test plan, test scenarios, defect log, API inventory, and Requirements Traceability Matrix (RTM).

E-Commerce Test Automation Framework (POM Architecture) -- GitHub Link Python · Selenium · Pytest · Allure · POM

- Built a full test automation framework using Python, Selenium WebDriver, and Pytest following Page Object Model (POM) architecture.
- Created 6 page objects covering login, inventory, cart, checkout, and product pages, with function-scoped fixtures for clean test isolation.
- Integrated Allure reporting with BLOCKER / CRITICAL / NORMAL severity tagging for clear and readable test results.

Wikipedia — Accessibility Audit (WCAG 2.1 Level AA) -- GitHub Link WAVE · Chrome DevTools · Keyboard Testing

- Accessibility audit of Wikipedia's AI article: 28 WAVE errors, 100 contrast issues, 1,322 alerts, 4 WCAG violations (missing alt text, empty links, broken ARIA roles, poor keyboard accessibility).

EDUCATION

Master of Computer Applications (MCA)	2023 - 2025
Bachelor of Computer Applications (BCA)	2020 - 2023
